

## **STATEMENT OF PURPOSE**

My name is [REDACTED], a permanent resident of Balkot, Suryabinayak 2, Bhaktapur, Nepal. I was born on 21<sup>st</sup> May 2003. I am intending to pursue a Bachelor of Information Technology at the King's Own Institute (KOI), Sydney, Australia for the March 2023 intake. I completed my SEE from in the year 2019 and secured a 3.45 GPA. As I was fascinated by Information Technology since my childhood, therefore, I then pursued for my higher studies with one of my major subjects as computer science. I completed Grade 12 in the year 2021 with a 3.41 GPA.

I have discovered that the education system in Nepal is quite constrained in terms of theory and traditional practices. The way of teaching is still not so advanced. In addition, the faculty is still using the traditional way of teaching and are far behind with the modern ways of teaching that are required by the students to keep them up to date with the world. I have already experienced around 15 years of education in Nepal and now I want to upgrade myself by getting a quality and career-oriented education.

After deciding which country I wanted to study in, it was challenging to choose the best education provider for me from the plenty of colleges and universities that provide programs of excellence, globally recognized courses, and certification. I began to research education providers that provide high-quality education in a convenient location with quality services, reasonable tuition fees, and an improved facility. So, after gaining a basic understanding of the colleges and universities offering Information Technology related courses through attendance at various education fairs, internet research, and conversation with my education advisor, I began looking for colleges by visiting their official websites and reviewing the courses they offer.

Once I finish my study, I envision a successful future in Nepal. I have always dreamed of being an owner of an IT company and it wouldn't be possible without the support of my loved ones. So, having my family by my side would act as my backbone. To complete my goal, I will come back to Nepal so that I initially get exposure to different well-known companies and later work out in my own IT company and expand it using my gained skills and expertise. Moreover, international graduates are highly prioritized in my country. Also, as I have an ethical and emotional attachment to my family, being able to work and spend time with them makes me pleased, thus I will return to my native country. My parents have worked very hard to give me unwavering emotional and financial support to become who I am today.

I have expressed all my genuine purpose and intention of studying in Australia. It will be a great honour for me to study at KOI. I will continue to work hard and prove myself as a good student with good academic achievement. I am excited to gain education and learn new things in Australia, and contribute to my own country after returning to my homeland.

With gratitude, I will be waiting for your response. I eagerly await your positive reply.

Sincerely,

[REDACTED]
